Detailed Action

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth below or on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. Specifically, nucleotide and amino acid sequences appear in Figs. 1 and 2 that are not listed in the Sequence Listing of record in the application.

Applicant must comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Applicant is requested to return a copy of the attached Notice to Comply with the reply.

The indicated allowability of claims 5-7 is withdrawn in view of the reference to Hallek et al., (U.S. Patent 6,352,696) said reference being provided by applicants in the IDS filed 4/29/02.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the

Art Unit: 1636

treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 5-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hallek et al.

Applicants claim a nucleic acid encoding a fusion protein or peptide comprising a less than full length sequence of HPV L2 (which can be from HPV11, HPV16, etc.) and a second sequence encoding a second peptide or protein (which can be HPV E7 protein or peptide).

Hallek et al. (Cited by applicants, see whole document, particularly column 3, lines 45-61; column 5, line 16 to column 6, line 64) recites the preparation of fusion proteins comprising truncated L2 protein sequences (which can be from HPVs such as HPV16) fused to second protein sequences such as a sequence from an HPV E7 protein and that said sequences can be prepared from nucleic acid sequences encoding said fusion proteins. Hallek et al. therefore teaches the claimed invention.

The amendment filed 4/29/02 to the specification to add the priority data has been entered.

An Abstract for the application will be prepared by copying the abstract from the PCT patent.

Claims 1-4, 8-10 and 12 are allowed.

Art Unit: 1636

Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on 4/29/02 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
